GET TO KNOW ISB GROUP

YOUR WORLDWIDE CONSOLIDATED PARTNER

ISB PRODUCTION
ITALIAN ENGINEERING CERTIFIED QUALITY

All ISB Group components are manufactured under European quality standards, in production centers with ISO 9001:2015 Certification.

Our status as manufacturers and the accumulated know-how, together with a polished set of materials selection, production development and quality controls, allows us to offer the client both standard and customized solutions subject to the needs of each application sector.

The ISB Group production plants are specialized in the manufacturing of bearings and components. Plants are all equipped with cutting-edge machinery and fully automated production lines that guarantee reliable, efficient production, as well as the greatest cost efficiency and precision with guaranteed and consistent quality.

ISB ENGINEERING

ISB TECHNICAL CENTERS ENGINEERING & QUALITY CONTROL

ISB Group Technical Centers (among which is the 1,500m² Technical Solutions Center at the Italian Headquarters) allow us to offer the client valuable support for each application sector since they are in charge of products homologation, monitoring of quality standards, load capacities and tests in a controlled environment...

A team of specialized engineers and technicians guarantees the production of ISB components under the strictest quality controls, developing R&D activities, suitability studies depending on the application and customer support both in pre-sales and after-sales.

The foundation of our product strategy is clear: "**Engineered to upgrade your ride**" ISB SPORT cycling bearings are designed and manufactured to optimize and guarantee performance in any application, so they are specially designed by our R&D Team to enhance their benefit regarding their location on the bike and its specific needs.

All ISB Technical Centers are equipped with complete, cutting-edge hardware and software which, together with the expertise of the staff, make it possible to offer our clients application and engineering support in every field.

ISB SERVICE WORLDWIDE LOGISTIC NETWORK

One of the ISB Group's main competitive advantages is its extensive stock levels. It must be noted that the ISB Central Logistics Hub in Italy, the 3rd largest in Europe in the sector, has a capacity of 56,000 pallets in stock and a total handling of 70,000 codes, which allows it to satisfy all customer needs in different production fields from the perspective of Industry 4.0.

The logistics structure of the ISB Group, with its presence in more than 90 countries through branches and distributors, makes it a reliable partner, capable of offering punctual service and personalized solutions such as Just in Time and KanBan.

In addition, our main warehouses network in Latin America, Europe and Asia have the capacity to supply ISB and OEM's branches directly from production plants, giving an excellent proximity service and allowing to optimize local stock levels and increase the service feeding the needs of local markets.

The internationalization and expansion strategy of the ISB Group is evident in its constant evolution and growth, with the opening of new branches, regulatory logistics warehouses & production centers with the aim of facilitating and enhancing a close, fast and quality service to the customer.

ISB SPORT RANGE

“ENGINEERED TO UPGRADE YOUR RIDE”

What matters isn't seen, it's felt.

At ISB SPORT, we've channeled our over 60 years of experience as bearing manufacturers into a line of high-performance sports bearings, fulfilling our motto: **“Endurance, Performance, Results.”** We design and manufacture our bearings to optimize and guarantee their performance in each application.

Sport lives on challenges, details, limits, efforts, commitment. At ISB Sport we share these values and we strongly believe that improving the performances of every single component is the only way to make progress.

CYCLING BEARINGS

ISB SPORT offers a full range of cycling bearings for mountain bikes, road bikes, gravel, e-bikes...

ENDURANCE BEARING SERIES

- Type of bearings: Steel bearings
- Main applications:
 - Wheel hub
 - Bottom bracket
 - Suspension pivot
 - Headset
 - eBike motor
 - Pulley wheel

PRO BEARING SERIES

- Type of bearings: Ceramic bearings
- Main applications:
 - Wheel hub
 - Bottom bracket
 - Pulley Wheel

OIL SEALS KITS

- Main application: Suspension fork

ROLLER BEARINGS

The ISB SPORT bearings range for roller applications includes bearings in different ABEC for the most common wheel axles

BEARINGS FOR 7mm WHEEL AXLE

- Type of bearings: Steel & Ceramic bearings
- Main applications:
 - Artistic figure skatings
 - Rink hockey
 - Roller derby
 - Roller freestyle

BEARINGS FOR 8mm WHEEL AXLE

- Type of bearings: Steel & Ceramic bearings
- Main applications:
 - Speed skating
 - Inline hockey
 - Inline freestyle
 - Skating

MOTORSPORT COMPONENTS

ISB SPORT offers a specialized range of motorsport components for motorcycles, RZR, quads, karts...

MOTORSPORT BEARINGS

- Ball bearings
- Roller bearings
- Needle bearings

*Steel bearings & Ceramic bearing

MOTORSPORT COMPONENTS

- Self aligning bearing units
- Spherical plain bearings
- Rod ends and clevises
- Seals & shafts

ISB SPORT RANGE

10

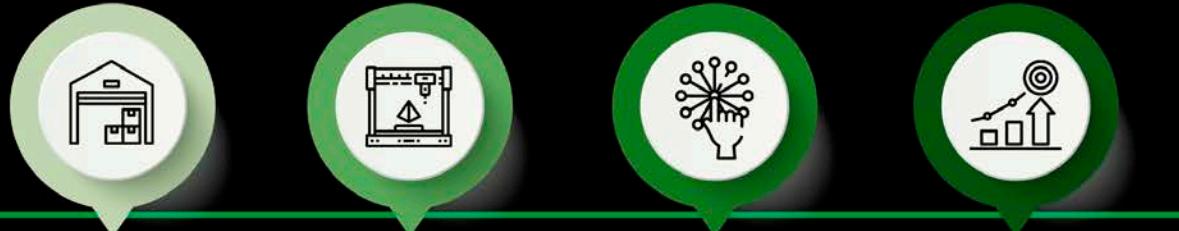

11

* Beside these main sport applications, ISB SPORT range also includes bearings & components for other applications such as fitness machine, fishing, radio controlled cars..

WHY CHOOSING ISB?

ISB GROUP has become one of the major international players in the field of industrial and sport components. Today, ISB is able to produce and distribute a complete range of high quality products to comply customer needs.

The widest availability of products ready in stock through our worldwide logistic network allows us to offer customers a fast pre and post sales service in every field of industrial & sport application.
